**Subject:** M6H1 – Harvey Response: PWS Operational Status Codes and Eval Forms

Hi David,  
After a conversation with TCEQ and the REOC, all of the information requested should be in Response Manager, including the status codes and population served as needed. It's being updated about hourly, and before 2 pm every day. We'll monitor it to ensure it's correct.

Another good source of information to track is the TCEQ Hurricane Harvey web page:

<https://www.tceq.texas.gov/response/hurricanes>

The Current Conditions heading provides daily updates on WW and DW treatment plant status and boil water notices as you've seen in the spreadsheets from 8/30 that I sent to you as an example. However, I'm told all of this including the operational status will now be in RM and updated more timely.

For Beaumont, TCEQ gave us an short update. They are still assessing outages in Orange County, but for the Beaumont Water Plant:

It's not operational now, but staff are running a line to the Nueces River near the existing intake on a temporary basis so service can be restored. By noon tomorrow they hope to be at half capacity, 10 MGD, and to full capacity of 20 MGD within 48 hours.

Storage tanks are full or near full and valved off. The town is on a boil water notice. The residents are being provided bottled water and porta potties are being trucked in and set up.

**Subject:** RE: PWS Operational Status Codes and Eval Forms

To clarify, we need the status code for each WWTP and DW system. Basically, we need an Excel export from Response Manager for all assessed systems.

We just have the DW status codes.  
I'll see if our NPDES folks have WW status codes.  
Jim

Jim, I don't see the status codes for WWTPs, but yes in terms of drinking water. I'll confirm with the EOC, but if you could assume a "yes" for now, that'll work. D

The second and third attachments provide operations status codes for ER. Is this what you had in mind?

Not sure why it prompts for that. I have attached all the water docs from there.

I also put them in H: drive which also has the WW docs.
